

Installing Configuration Wizards In Nagios XI 5

Purpose

This document describes how to install Configuration Wizards in Nagios XI.

If you're installing Configuration Wizards on Nagios XI 2024, see [Installing Configuration Wizards in Nagios XI 2024](#)

Configuration Wizards Overview

Configuration Wizards are add-ons that simplify the setup process for monitoring in Nagios XI. Instead of manually configuring settings, wizards provide an intuitive, step-by-step interface that:

- Streamlines complex configuration tasks.
- Assists users unfamiliar with Nagios XI's backend.
- Automatically generates all necessary monitoring configurations.

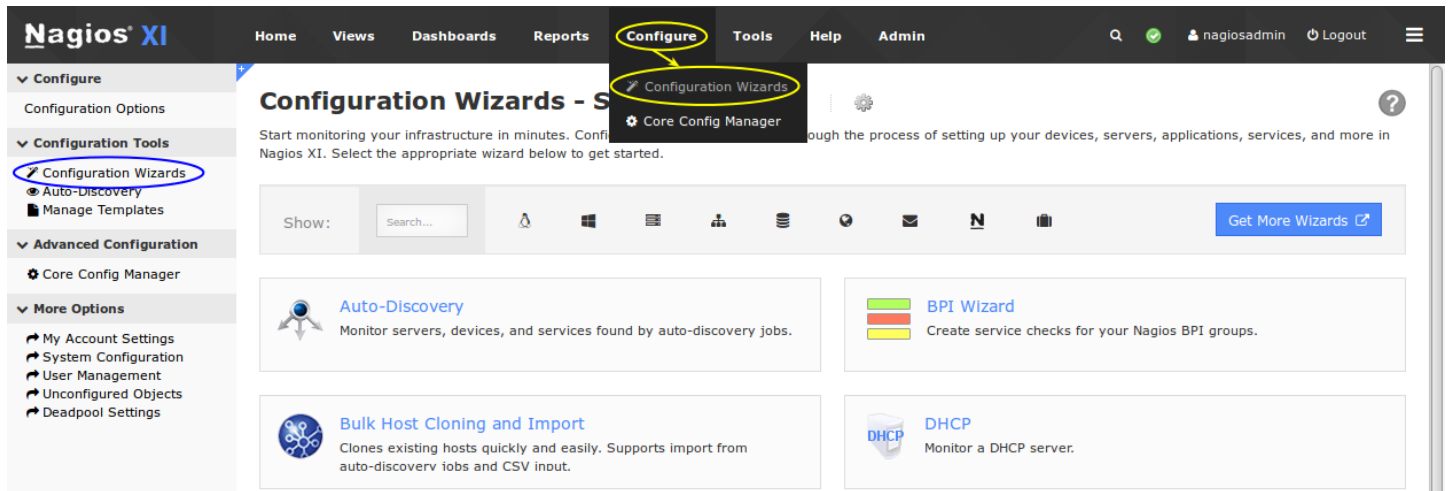

Watch and Learn: Check out our video tutorial on Adding Configuration Wizards.

Installing Configuration Wizards In Nagios XI 5

Accessing Installed Configuration Wizards

Once installed, Configuration Wizards can be accessed via **Configure > Configuration Wizards** in the Navigation menu

Quick Search Tips:

- Use the Search Box to filter wizards (eg., typing “wind” displays wizards related to Windows).
- Click on category icons next to the search box (e.g., the Windows icon filters all Windows-related wizards like Exchange, MSSQL, NCPA, and NRPE).

- Open Source Powered Monitoring On Steroids
- And So Much [More!](#)

Here, you'll find both:

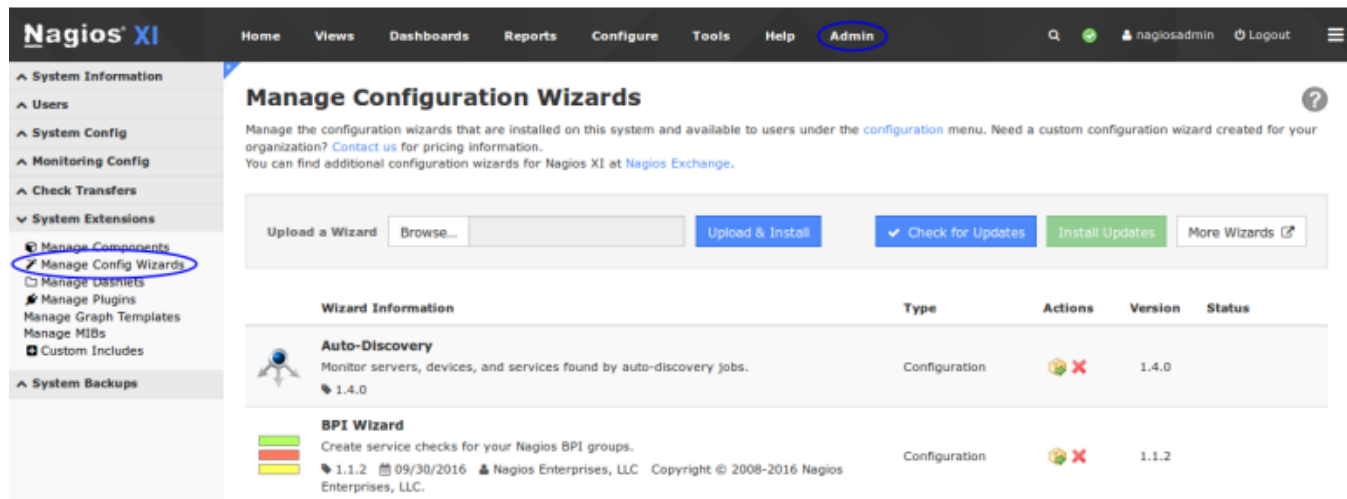

- Official Wizards that come with Nagios XI
- Community-Contributed Wizards developed by external parties

Installing Configuration Wizards In Nagios XI 5

Installing a Configuration Wizard

Installing a new configuration wizard in Nagios XI is straightforward

1. Navigate to **Admin > System Extensions > Manage Config Wizards**.

2. Click the **Browse** button to select .zip file you downloaded.
3. Click the **Upload & Install** button to complete the installation.
4. Once uploaded, a confirmation message will appear, and the wizard will be added to your list.

Now, when you return to the **Configure** menu, the newly installed wizard will be available.

Finishing Up

This completes the documentation on installing Nagios XI Configuration Wizards. If you have additional questions or other support-related questions, please visit us at our Nagios Support Forum, Nagios Knowledge Base, or Nagios Library:
