Purpose

This document describes how to add or modify Nagios Network Analyzer user accounts.

Target Audience

This document is intended for use by Nagios Network Analyzer Administrators who need to create or modify users.

User Management

In Nagios Network Analyzer navigate to Administration > Authentication > User Management.

The User Management page allows administrators to create new users and edit or delete existing users.
Create User

To create a new user click the Create User button.

You will be presented with a list of fields to populate for creating a new user. The fields with an asterisk next to them are required.

User Details

• First & Last Name
• Company Name
• Email address
• Phone Number

Account Information

• Username
• Password
• Language

Authentication Settings

• Nagios Network Analyzer allows you to use external authentication sources such as LDAP and Active Directory (AD)
• The Local option is selected by default
• For LDAP / AD options please refer to the External Authentication section of this document
User Access Level

On the permissions tab you define if the user is an **Admin** or **User**. The difference between the two is explain next to the selections.

API Access

You can enable API access for an account by setting this option to **Yes**. When creating new users the default selected option is **No**.

Click the **Create User** button once you have finished populating the fields.

Here is what the page would look like after creating a new user. It shows the original Administrator account and the newly created User account we made for this example:

### User Management

<table>
<thead>
<tr>
<th>Username</th>
<th>Email</th>
<th>Access Level</th>
<th>Account Type</th>
<th>API Access</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>nagiosadmin</td>
<td></td>
<td>Admin (Full Access)</td>
<td>Local</td>
<td>Yes</td>
<td>Edit</td>
</tr>
<tr>
<td>troylea (Troy Lee)</td>
<td><a href="mailto:troy@domain.local">troy@domain.local</a></td>
<td>User (Read Only)</td>
<td>Local</td>
<td>Yes</td>
<td>Edit • Delete</td>
</tr>
</tbody>
</table>

Edit User

To edit an existing user click the **Edit** link in the **Actions** column. This will present page similar to the Create User page explained in the previous section.

Click the **Save User** button after making any changes.
Delete User

To delete an existing user click the **Delete** link in the Action column.

You will be prompted to confirm this action before the user is deleted.

External Authentication

Nagios Network Analyzer allows you to use external authentication sources such as Lightweight Directory Access Protocol (LDAP) or Active Directory (AD). Please refer to the following documentation for more information:

[Authenticated and Importing Users with AD and LDAP](#)

Finishing Up

This completes the documentation on managing users in Nagios Network Analyzer.
