Managing Users in Nagios Network Analyzer 2024

User Management

In Nagios Network Analyzer navigate to **Administration > Authentication > User Man**agement.

User Management									
+ Create User	Add Users from LDAP/AD								
Username	Email	Access Level	Account Type	API Access	Action				
nagiosadmin		Admin (Full Access)	Local	Yes	Edit				

The User Management page allows administrators to create new users and and edit or delete existing users.

Create User

To create a new user click the Create User button.

- The Local option is selected by default
- For LDAP / AD options please refer to the <u>External Authentication</u> section of this document

Nagios

Managing Users in Nagios Network Analyzer 2024

User Access Level					
Set the user level of access inside the UI.					
Admin - Full Access. Admins can change/delete all components including sources, sourcegroups, views, reports, queries, and checks. They can also update the NNA configuration and manage users.					
User - Limited Full Access. Users can see everything except the configuration options. However, they can not edit anything except their own profile's password, contact info, and api key.					
API Access					
If you want to allow this user to use the external API via an access key.					
Yes					

No No

User Access Level

On the permissions tab you define if the user is an Admin or User. The difference between the two is explain next to the selections.

API Access

You can enable API access for an account by setting this option to Yes. When creating new users the default selected option is No.

Click the Create User button once you have finished populating the fields.

Here is what the page would look like after creating a new user. It shows the original Administrator account and the newly created User account we made for this example:

Managing Users in Nagios Network Analyzer 2024

User Management									
+ Create User Add Users from LDAP/AD									
Username	Email	Access Level	Account Type	API Access	Action				
nagiosadmin		Admin (Full Access)	Local	Yes	Edit				
troylea (Troy Lea)	troy@domain.local	User (Read Only)	Local	Yes	Edit • Delete				

Edit User

To edit an existing user click the Edit link in the Actions column. This will present page similar to the Create User page explained in the previous section.

Click the Save User button after making any changes.

Delete User

To delete an existing user click the Delete link in the Action column.

You will be prompted to confirm this action before the user is deleted.

External Authentication

Nagios Network Analyzer allows you to use external authentication sources such as Lightweight Directory Access Protocol (LDAP) or Active Directory (AD). Please refer to the following documentation for more information:

Authenticating and Importing Users with AD and LDAP
