

How To Use Reports In Nagios Network Analyzer 2026

Purpose

This document describes how to download and schedule Reports for automatic email delivery in Nagios Network Analyzer 2026.

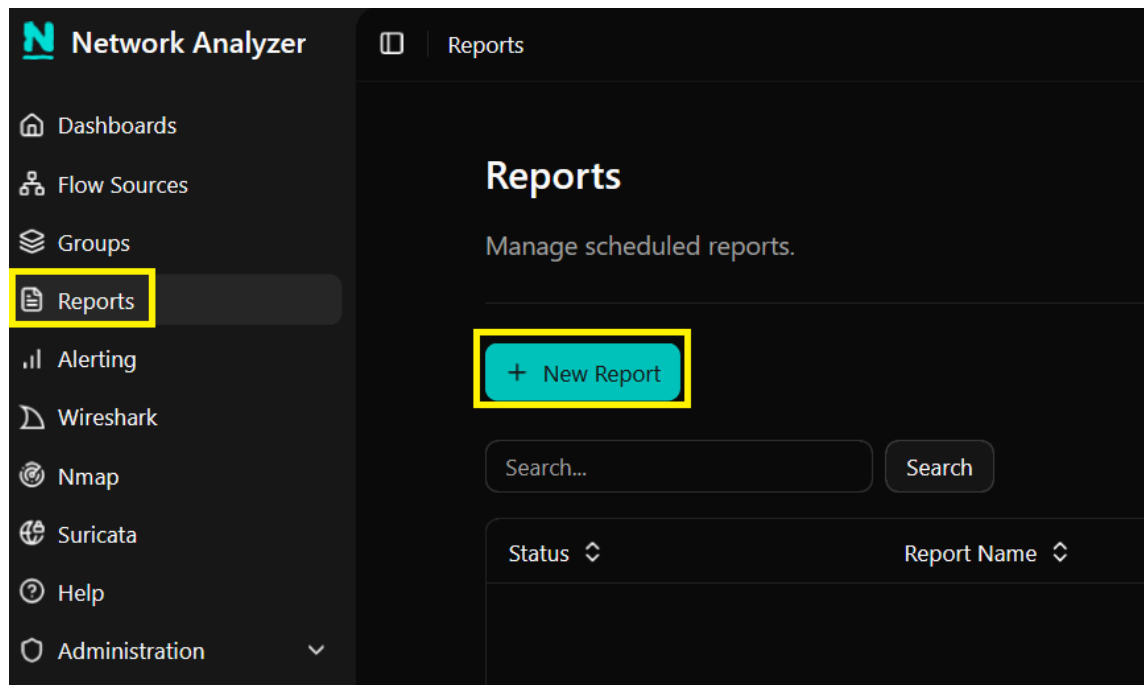

Creating Dashboards

In Nagios Network Analyzer 2026, reports are based on your custom dashboards. So the first step is to create a dashboard which includes the data you'd like to see reflected in your report. You can learn more about creating and managing dashboards here:

[Using Dashboards in Network Analyzer 2026](#)

Creating A Scheduled Report

To begin, navigate to the Reports menu, and click the **+ New Report** button.

How To Use Reports In Nagios Network Analyzer 2026

Next, add a friendly **Name** for the report, choose the **Dashboard** to base it on, select either PDF or JPG **Format**, choose the email **Recipients**, and define the **Schedule** and **Time**. You can also choose to disable the report after initial creation with the **Enabled** checkbox.

Create Report

Use this to create a new scheduled report.

Name

Awesome Report

Submit

Once you've entered your data and made your selections, click **Submit**.

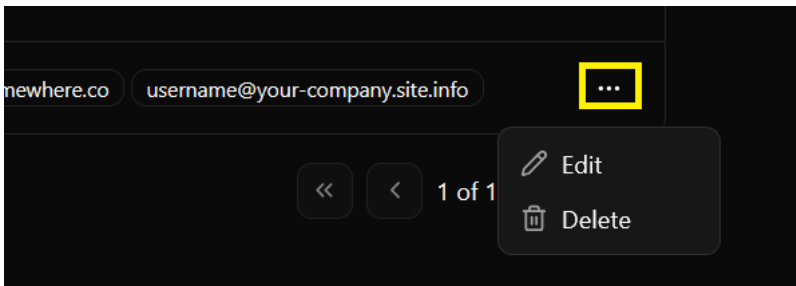

Your report will now show in the **Reports** menu list.

Status	Report Name	Schedule	Format	Recipients
<input checked="" type="checkbox"/>	Awesome Report	Daily	PDF	address@company-name.co

How To Use Reports In Nagios Network Analyzer 2026

Editing and Deleting Reports

To edit or delete a report, click the Actions icon (three horizontal dots) on the far right of the listing, and choose your desired option.

Enabling and Disabling Reports

To enable or disable a report, use the toggle on the far left of the entry in the Status column.

Downloading Reports

If you'd like to download a PDF or JPG of a dashboard immediately, rather than scheduling delivery, simply navigate to the target dashboard in the Dashboards menu, then click Download on the upper right.

Finishing Up

This completes the documentation on how to use reports in Nagios Network Analyzer. If you have additional questions or other support-related questions, please visit us at our Nagios Support Forum, Nagios Knowledge Base, or Nagios Library:
