

How To License And Activate Nagios Fusion

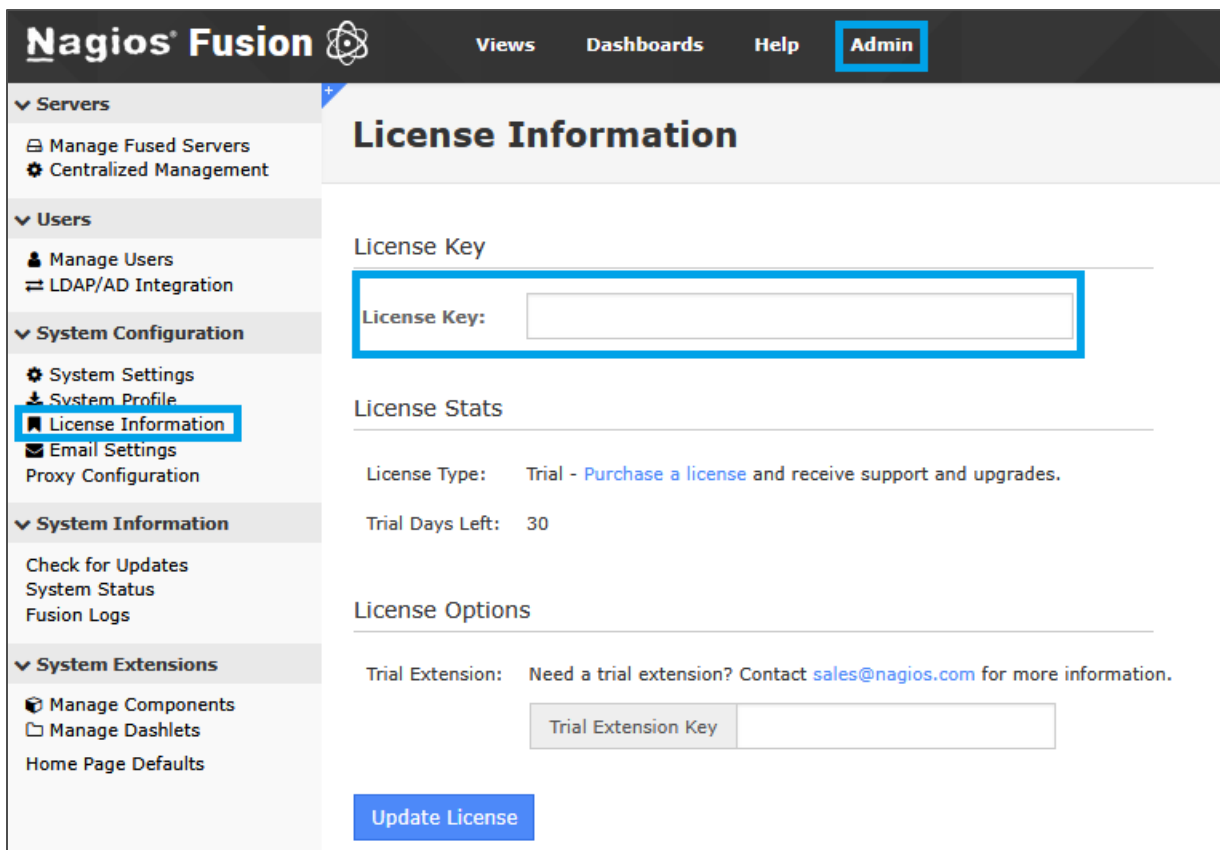

Purpose

This document describes how to license and activate your Nagios Fusion installation.

Adding a License Key

To begin, navigate to the **Admin > License Information** menu.

Enter your License Key, then click the **Update License** button:

The screenshot shows the Nagios Fusion Admin interface. The top navigation bar includes 'Views', 'Dashboards', 'Help', and 'Admin' (highlighted with a blue box). The left sidebar menu has categories: 'Servers' (Manage Fused Servers, Centralized Management), 'Users' (Manage Users, LDAP/AD Integration), 'System Configuration' (System Settings, System Profile, License Information - highlighted with a blue box, Email Settings, Proxy Configuration), 'System Information' (Check for Updates, System Status, Fusion Logs), and 'System Extensions' (Manage Components, Manage Dashlets, Home Page Defaults). The main content area is titled 'License Information' and contains three sections: 'License Key' with a text input field (highlighted with a blue box), 'License Stats' showing 'License Type: Trial - Purchase a license and receive support and upgrades.' and 'Trial Days Left: 30', and 'License Options' showing 'Trial Extension: Need a trial extension? Contact sales@nagios.com for more information.' with a 'Trial Extension Key' input field. At the bottom of the main content area is a blue 'Update License' button.

Once you click **Update**, you will see a “License Key has been updated” message at the top of the interface, and a new **License Activation** section at the bottom of the menu.

How To License And Activate Nagios Fusion

To activate your system, click the **Activate your license key** link:

License key has been updated.

License Information

License Key

License Key:

License Stats

License Type: Server-Based

Number of Licensed Servers: Unlimited

Current Servers: 0

Maintenance Status: Current (Expires in **1,716** days on **2030-09-14**) - [Renew Now](#)

License Activation

Activation Status: **Not Activated** [Activate your license key](#)

Update License

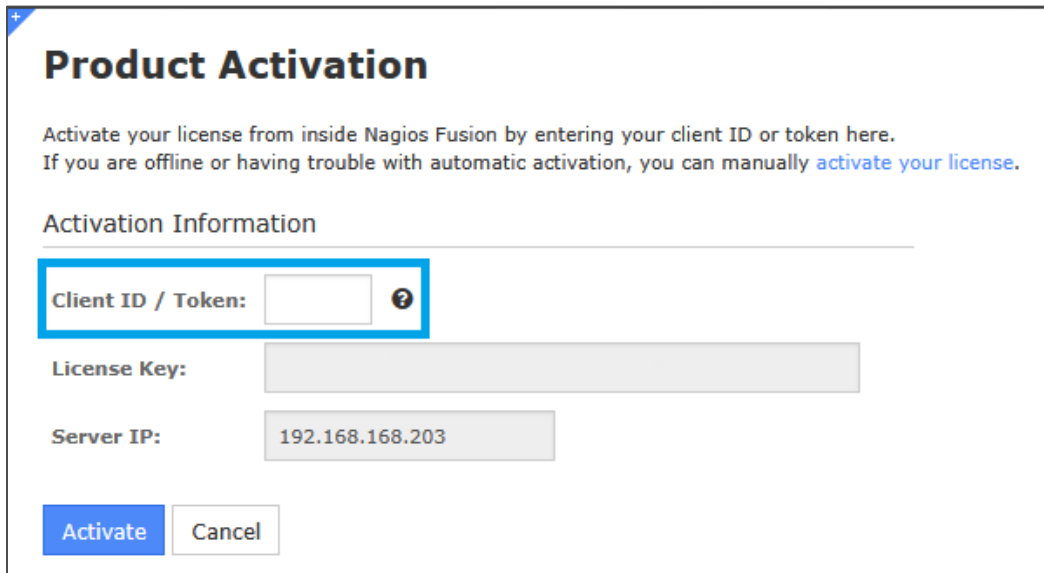

If your Nagios Fusion server has internet access, proceed to the next section.

If your Fusion server is offline, skip to the [Offline Activation](#) section.

How To License And Activate Nagios Fusion

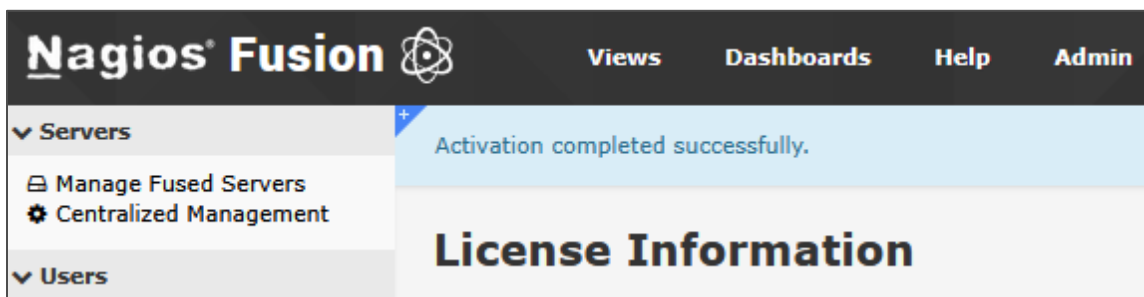

Online Activation

On the Product Activation page, enter your Client ID, then click **Activate**:

The image shows a 'Product Activation' form. At the top, it says 'Product Activation' in bold. Below that, it says 'Activate your license from inside Nagios Fusion by entering your client ID or token here. If you are offline or having trouble with automatic activation, you can manually [activate your license](#).' Under 'Activation Information', there is a text input field for 'Client ID / Token' which is highlighted with a red box. Below this is a 'License Key' field, a 'Server IP' field with the value '192.168.168.203', and two buttons: 'Activate' (in red) and 'Cancel'.

Upon successful activation, you will see an 'Activation completed successfully' message at the top of the interface:

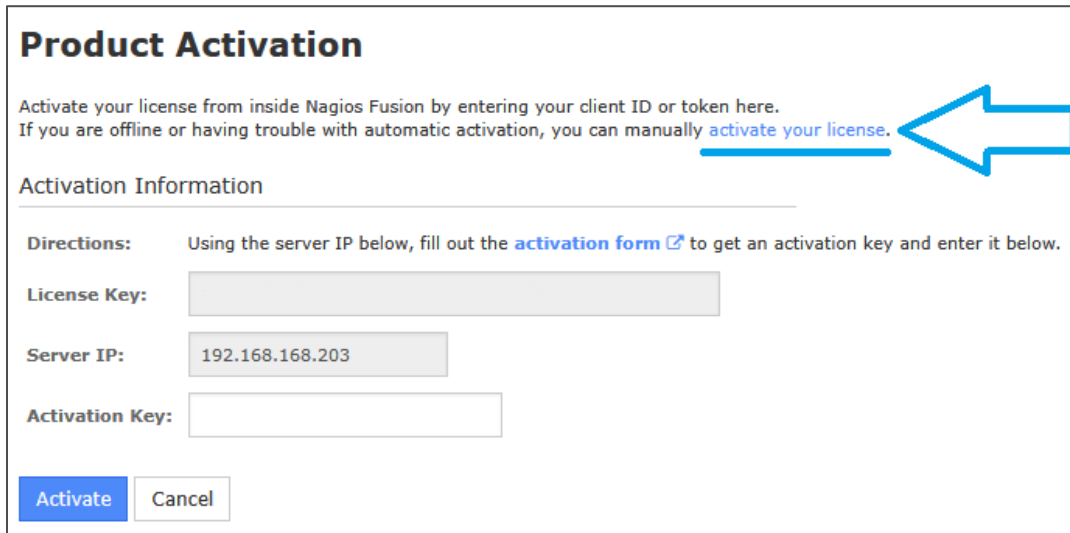

Offline Activation

To activate a Nagios Fusion server which does not have internet access, you will need access to a separate online system to visit the activation form page on.

How To License And Activate Nagios Fusion

First, click the **activate your license** link at the top of the Product Activation menu to proceed to the manual activation menu.

Product Activation

Activate your license from inside Nagios Fusion by entering your client ID or token here.
If you are offline or having trouble with automatic activation, you can manually [activate your license](#).

Activation Information
