

Purpose

This document describes Nagios Fusion views, what they are used for, and how they can be managed.

Target Audience

This document is intended for use by Nagios Administrators and Users.

Views Overview

Views are designed to provide individual users with quick access to Nagios Fusion pages and external websites they find useful. Views are often used by network administrators who wish to display important information on wall monitors in network operations centers (NOCs) or public locations.

Views are specific to individual Nagios Fusion users. Each user can create their own unique set of views to customize Nagios Fusion to fit their needs.

Accessing Views

Views can be accessed by clicking on the **Views** link located on the navigation menu.

Server	Hosts							Services							
	Up	Down	Unreachable	Pending	Flapping	Problems	Unhandled	All	Ok	Warning	Critical	Unknown	Pending	Flapping	Problems
Nagios XI COLO A	28	0	0	0	0	0	0	28	340	1	0	0	0	0	1
Nagios Core COLO B	19	14	1	2	0	15	15	36	64	17	64	34	3	0	115
Totals	47	14	1	2	0	15	15	64	404	18	64	34	3	0	116

The **Views** page will automatically rotate through each of the views the user has defined. On the screenshot on the previous page:

- In the left pane under **My Views** you can see that **Tactical Summary** is the currently displayed view
- In the left pane at the **top** the rotation has **4** seconds remaining before the next view (Recent Alerts) is shown

View Rotation

By default, Nagios Fusion will rotate through the different views you have defined. This rotation can be stopped at any time by:

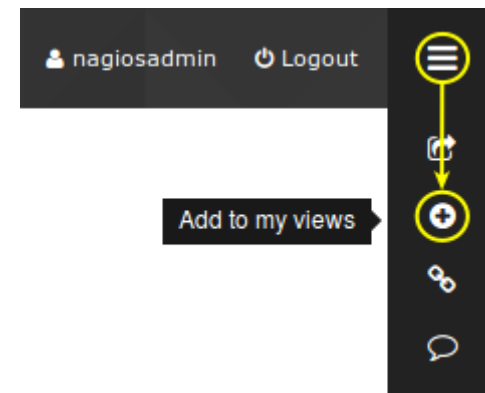

- Clicking the **pause** button
- Clicking the **Stop Rotation** link
 - The pause button will change to a resume button

The speed of the rotation can be adjusted by moving the slider located at the top left of the navigation pane (next to the pause button). The slider varies from 5 seconds to 60 seconds.

Adding New Views

New views can easily be added from anywhere within Nagios Fusion. On the far right of the Navigation menu bar there is an icon with three horizontal lines. When you hover over this icon a drop down list of icons appears.

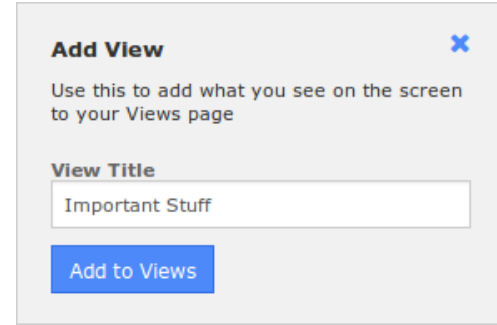

Click the **+** icon to add the current page to your views.

A popup window will appear and you will need to provide a View Title.

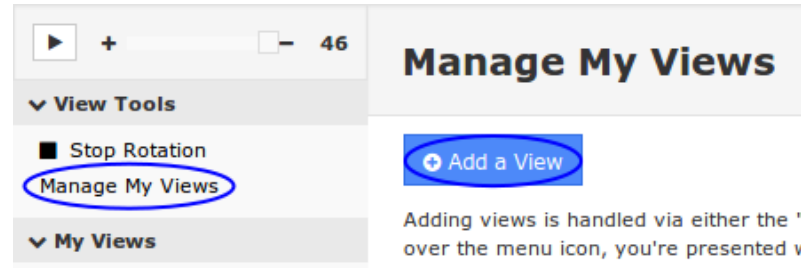

Click the **Add to Views** button to add the dashboard to your views.

Click the **Views** menu item and you will now see this dashboard is now listed under **My Views**.

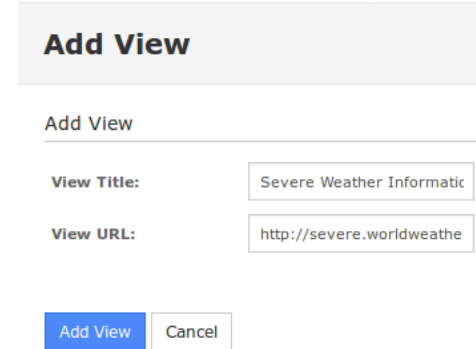

Adding New Views - External URL

New views can also be added from within the **Manage My Views** page by clicking the **Add a View** button. This allows you to provide links to external URLs which can help you with a "single pane of glass" NOC screen.

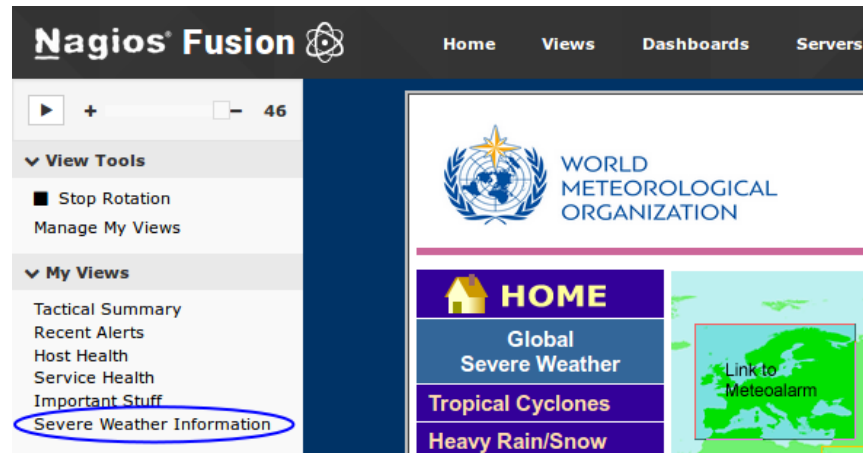

When you click the button you will need to provide a View Title and the URL.

Click the **Add View** button to add the view.

Here is a screenshot showing the newly added view.

Managing Views

Click the **Manage My Views** link under **View Tools** to perform the following actions.

Reorder the views by dragging and dropping them into the order that you desire.

Click the **Edit** icon  to change the **View Title** or **URL**.

Click the **Remove** icon  to remove a view from the **My Views** list.

Manage My Views

Adding views is handled via either the "Add a View" button directly above this paragraph or your mouse over the menu icon, you're presented with different options. Select the view you want to manage.

Use the Manage My Views table below to re-order, edit, and remove views. You can click on the red x to remove them.

View Title	
Tactical Summary	 
Recent Alerts	 
Host Health	 
Service Health	 
Important Stuff	 
Severe Weather Information	 

Finishing Up

This completes the documentation on understanding and using views in Nagios Fusion.
