

Purpose

This document describes how to customize the landing page that users see when they initially login to the Nagios XI web interface. One of the benefits of Nagios XI is the flexibility to customize the information users see in the web interface. Customizing the landing (home)

page within Nagios XI allows users to get the most important information as soon as they log into Nagios XI.

Target Audience

This document is intended for use by Nagios XI Administrators and users who want to customize their Nagios XI web interface.

The Landing Page

By default, the landing (home) page that users are directed to when they login is their home dashboard. The home dashboard can be customized with dashlets the user finds useful and can also be managed under the **Dashboards** menu.

In some cases, it may be desirable to direct the user to a different page or change the title of the home dashboard. Customizing the landing page can be useful in scenarios like these:

- An multiple service provider wants to display their company website as the landing page, so their customers know how to contact them
- A company wants users to see a customized dashboard or specific status screen as the landing page so they are immediately informed as to the status of the IT infrastructure

Home Page Modification Component

The Home Page Modification component allows for admins and end-users to customize what page is displayed when they login. Navigate to the **Admin > System Extensions > Manage Components** page.

<u>N</u> agios' XI	Home Views Dashboards Reports Configure Tools Help Admin			Q 📀	占 nagiosadmin	එ Logout	≡

Find the **Home Page Modification** component in the list and click the configure icon.

Configuration options allow administrators to:

- Change the title of the home dashboard (when it is displayed as the landing page)
- Redirect the landing page to a custom URL
- Allow end-users to customize the the title and/or URL that is displayed as the landing page, any valid URL can be used as the landing page

Nagios

www.nagios.com

This example sets the landing page to the Tactical Overview screen.

Specify the following URL in the Custom URL field:

/nagiosxi/includes/components/xicore/tac.php

Home Page Modification	on Settings
Home Page Title:	Nagios XI
	Used to override the default home page title. Can be empty which will remove the title
Home Page Destination:	Custom URL -
	Where should the home page be directed?
Custom URL:	/nagiosxi/includes/components/xicore/tac.php
	Specifies a custom URL to be shown as the default home page.
	Allow users to override their default home page settings.

When finished updating the URL, click the Apply Settings

button and navigate to the Home page via the top menu. The updated landing page will display the Tactical Overview information. This will apply to all users that have their home page destination set to **Admin Default**.

End-User Customization

Another option on the **Home Page Modification** page is the **Allow User-Override** check box. This option allows end users to define their own landing page.

They can customize their home page by accessing their account page by clicking on the user name in the upper right corner of the page. Once on their account page they can Navigate to **My Account > Home Page Options**.

<u>N</u> agios' <mark>X</mark> I	Home Views	Dashboards R	eports Configure	tools	Help	Admin	a 📀	占 nagiosadmin	ዕ Logout	€

From here they can set the **Home Page Destination** to Custom URL and then define their Custom URL in the field. The example on the

previous page is using one of their personal dashboards.

Now when the user clicks Home on the menu bar they will see their custom dashboard, the screenshot to the right is an example of this.

<u>N</u> agios XI	Home Views	Dashboards	Reports Configure	Tools He	lp Admin
