

# How To Use The Nagiostats Wizard In Nagios XI 2024 And 2026

## Purpose

This document explains how to use the Nagiostats Wizard in Nagios XI to monitor key performance statistics related to the Nagios Core engine that powers Nagios XI's monitoring, including metrics such as the number of active and passive checks being run and check latency.

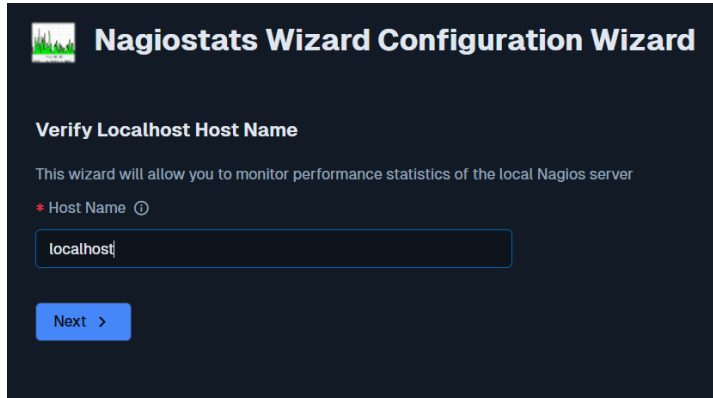

## Using the Nagiostats Wizard

1. Navigate to **Configure > Configuration Wizards** and search for 'stats', then click the **Nagiostats Wizard**.

# How To Use The Nagiostats Wizard In Nagios XI 2024 And 2026

2. In **Step 1** you'll most likely leave the **Host Name** as localhost, but you can change this if you want these checks to populate under a different host name. Click **Next** to proceed.

**Nagiostats Wizard Configuration Wizard**

**Verify Localhost Host Name**

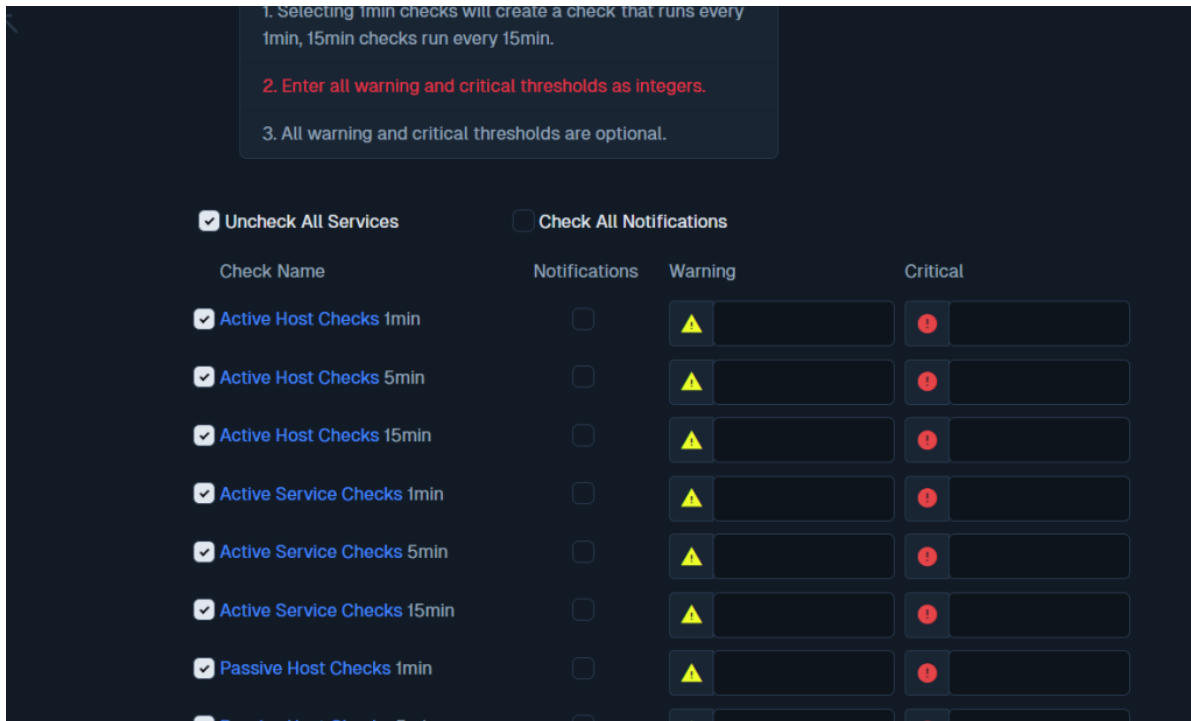

This wizard will allow you to monitor performance statistics of the local Nagios server

\* Host Name ⓘ

localhost

Next >

3. In **Step 2**, select the checks you want to monitor and their warning and critical thresholds. When you are finished click **Next**.

1. Selecting 1min checks will create a check that runs every 1min, 15min checks run every 15min.

2. Enter all warning and critical thresholds as integers.

3. All warning and critical thresholds are optional.

☒ Uncheck All Services ☐ Check All Notifications

Check Name	Notifications	Warning	Critical
<input checked="" type="checkbox"/> Active Host Checks 1min	<input type="checkbox"/>	 <input type="text"/>	 <input type="text"/>
<input checked="" type="checkbox"/> Active Host Checks 5min	<input type="checkbox"/>	 <input type="text"/>	 <input type="text"/>
<input checked="" type="checkbox"/> Active Host Checks 15min	<input type="checkbox"/>	 <input type="text"/>	 <input type="text"/>
<input checked="" type="checkbox"/> Active Service Checks 1min	<input type="checkbox"/>	 <input type="text"/>	 <input type="text"/>
<input checked="" type="checkbox"/> Active Service Checks 5min	<input type="checkbox"/>	 <input type="text"/>	 <input type="text"/>
<input checked="" type="checkbox"/> Active Service Checks 15min	<input type="checkbox"/>	 <input type="text"/>	 <input type="text"/>
<input checked="" type="checkbox"/> Passive Host Checks 1min	<input type="checkbox"/>	 <input type="text"/>	 <input type="text"/>
<input checked="" type="checkbox"/> Passive Host Checks 5min	<input type="checkbox"/>	 <input type="text"/>	 <input type="text"/>

4. Complete the wizard by choosing the required options in **Step 3 – Step 5**.

To finish up, click on **Finish** in the final step of the wizard. This will create the new host and services and begin monitoring.

Once the wizard applies the configuration, click the **View status details** for link to see the new service that was created.

## Finishing Up

This completes the documentation on Using the Nagiostats Wizard in Nagios XI. If you have additional questions or other support-related questions, please visit us at our Nagios Support Forum, Nagios Knowledge Base, or Nagios Library.
