

How To Monitor OpenAI Usage with Nagios XI

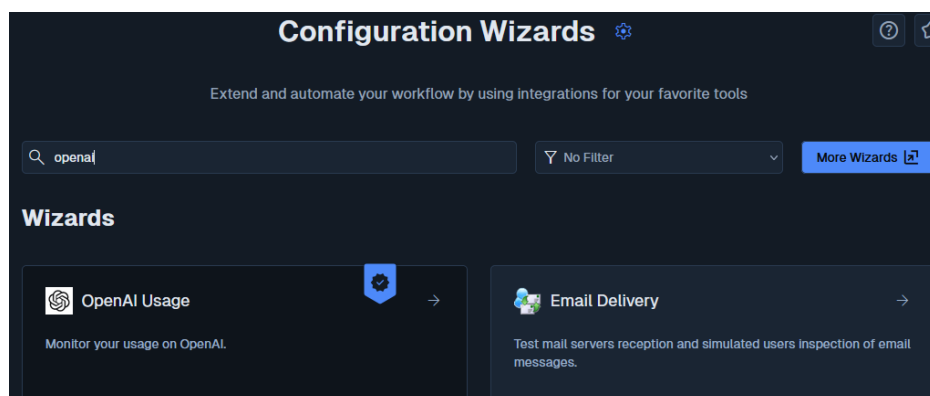

Purpose

This document describes how to monitor OpenAI usage with Nagios XI, using the OpenAI Usage wizard. If your goal is to monitor metrics like total cost, request usage, total input tokens, total cached input tokens, and total output tokens, you are in the right place.

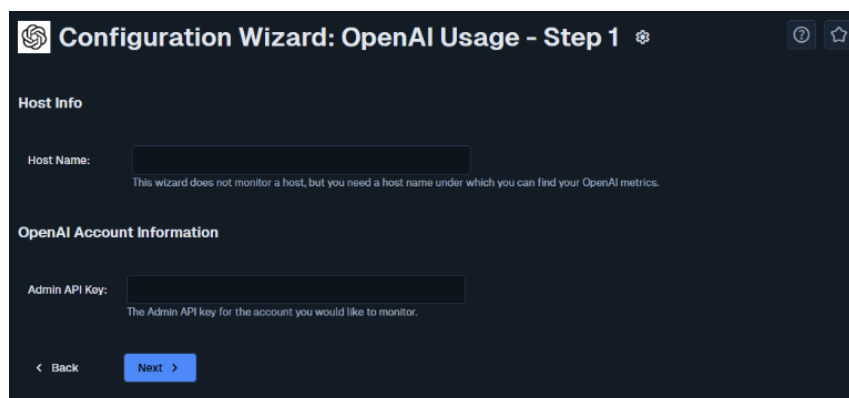

Important Note: this wizard is one of Nagios XI's Premium features, so requires active support and maintenance benefits to function. For questions about renewing your benefits if they have lapsed, please email sales@nagios.com so we can assist you further.

Using the OpenAI Wizard

1. To begin using the OpenAI wizard navigate to **Configure > Configuration Wizards**, search for 'openai', and click the **OpenAI Usage Wizard**.

2. In **Step 1**, you will enter a meaningful **Host Name** to help you locate and identify your OpenAI checks, and the **Admin API Key** for your OpenAI account. Note that project keys beginning with `sk-proj-` will not work. An Admin key beginning with `sk-admin-` is required.

How To Monitor OpenAI Usage with Nagios XI

3. In **Step 2** of the wizard, you will select the OpenAI usage metrics you'd like to monitor, along with their alert thresholds.

Configuration Wizard: OpenAI Usage - Step 2

OpenAI Cost Metrics

Specify which OpenAI cost metrics you wish to monitor.

- ☒ **Total Cost**
Monitor the total cost for this period.
Time period (Max: 180 days)
Warning: [] \$ Critical: [] \$ Time period: 1 Day
- ☒ **Request Usage**
Monitor amount of requests made this period.
Time period (Max: 31 days)
Warning: [] Critical: [] Time period: 1 Day
- ☒ **Total Input Tokens**
Monitor total input tokens used this period.
Time period (Max: 31 days)
Warning: [] Critical: [] Time period: 1 Day
- ☒ **Total Cached Input Tokens**
Monitor total cached input tokens used this period.
Time period (Max: 31 days)
Warning: [] Critical: [] Time period: 1 Day
- ☒ **Total Output Tokens**
Monitor total output tokens for this period.
Time period (Max: 31 days)
Warning: [] Critical: [] Time period: 1 Day

< Back **Next >** ✓ Finish with Template

4. Complete the wizard by choosing the required options in **Step 3 – Step 5**.

To finish up, click on **Finish** in the final step of the wizard. This will create the new host and services and begin monitoring.

Once the wizard applies the configuration, click the **View status details for** link to see the new services that were created.

How To Monitor OpenAI Usage with Nagios XI
