### **How To Monitor Devices Using The NCPA Agent and Wizard**

## **Purpose**

This document describes how to use Nagios XI to actively monitor machines via the Nagios Cross Platform Agent (NCPA). NCPA is an advanced, cross-platform agent that can be installed on Windows / Linux / AIX / Mac OS X machines.

# **Target Audience**

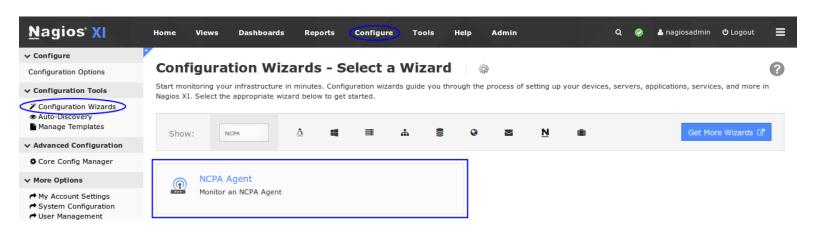

This document is intended for use by both Nagios administrators and users who wish to use NCPA.

## **Installing NCPA**

Before you can use the instructions outlined in this document, you must first install NCPA on the target Windows / Linux / AIX / Mac OS X machine you wish to monitor. Instructions for installing NCPA can be found in the <a href="Installing NCPA">Installing NCPA</a> documentation.

## **Running The NCPA Agent Wizard**

To begin using the NCPA Agent wizard navigate via the top menu bar to **Configure > Run a configuring** wizard and select the **NCPA Agent** wizard. In the following screenshot you can see how the search field allows you to quickly find a wizard.

## **How To Monitor Devices Using The NCPA Agent and Wizard**

### Step 1

Type the **address** of the host you want to monitor.

You can specify the port number if you have changed it from the default of **5693**.

Type the **Token** you are using on the NCPA agent.

#### Click Next.

When you click Next the Token will be validated, if it is not correct you will not be able to proceed to the next step of the wizard.

### Step 2

On this step you will configure all of the options for monitoring. In the screenshot to the right you can see the options available.

To start off with make sure a valid **Host Name** has been entered.

Select the metrics that you'd like to monitor.
You can adjust the warning and critical
thresholds for each metric to suit your needs.

isk Metrics  pecify the disks the the warning and critical percentages for disk capacity.	Specify the v	connection details of the NCPA agent.

### **How To Monitor Devices Using The NCPA Agent and Wizard**

The screenshot to the right shows the metrics that could not be shown on the previous page.

You can adjust the warning and critical thresholds for each metric to suit your needs.

Click **Next** once you have selected all the required options.

Network Inter	face Metrics				
Specify reasonal measurements a		our network interface	es. Note that t	these	
Local Area	Connection		<u> 10</u>	Mb 🕕	100 Mb
Services					
	K when the process	nning or stopped. Dep is in the selected sta	_		
Service	Name	Expected 9	Status

Add Another Ser	vice Check				
Running Proc	esses				
Specify which pro	ocesses should be r	unning, and how mar	ny should be.		
Process Na	ame	Display Name		Warning #	Critical #
				60	100
Add Another Pro	cess Check				
<b>∢</b> Back Ne	ext >				

Complete the wizard by choosing the required options in Step 3 – Step 5.

To finish up, click on **Finish** in the final step of the wizard. This will create the new host and services and begin monitoring.

### **How To Monitor Devices Using The NCPA Agent and Wizard**

Once the wizard applies the configuration, click the **View status details for** *NCPA HOST***>** link to see the new service that was created.
