

How To Use Dashboards In Nagios XI 2026

Purpose

This document describes how to create and manage custom Dashboards in Nagios XI 2026.

Accessing Dashboards

To begin, navigate to the **Dashboards** menu. The first thing you will see is the built-in **localhost** Smart Dashboard. You'll also see pre-loaded Linux Servers and Websites dashboards.

Smart vs. Legacy Dashboards

To begin, a quick explanation of the two dashboard types:

Smart Dashboards

Introduced in Nagios XI 2026, [Smart](#) Dashboards provide a modern look and responsive React design, as well as a Smart Dashboard Wizard to help you automatically generate dashboards for individual hosts, groups, or Nagios XI system metrics.

Legacy Dashboards

[Legacy](#) dashboards are the traditional dashboards longtime users will be most familiar with. Although many Legacy dashlets have a Smart equivalent, some dashlets such as Metrics, Hostgroup Summary, Overview, and Grid, and Metrics are currently Legacy-only.

[Universal](#) dashboard management options will be covered toward the end of this document.

How To Use Dashboards In Nagios XI 2026

Creating a New Smart Dashboard

Smart Dashboard Wizard

To automatically generate a new Smart dashboard, click **Smart Dashboard Wizard** in the **Dashboard Tools** section, then give it a **Title**, select the object or group you'd like to use as a data source in the **Template** dropdown. You can also choose whether to make it a personal dashboard visible only to your user, or a Global dashboard visible to all system users.

Select Type of Dashboard

Global

☐

Submit

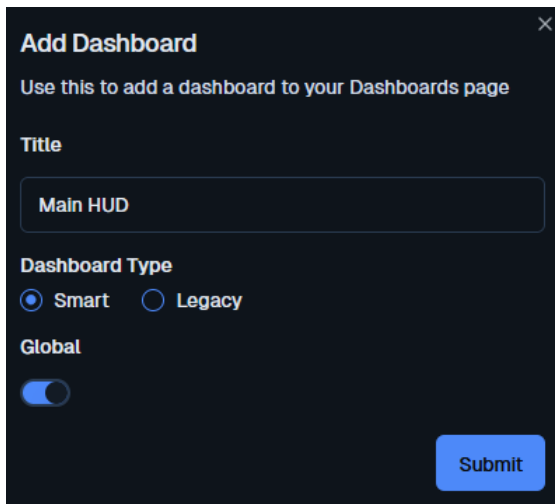

Once you make your selections, click **Submit**, and a new dashboard will be created for you. Here's an example that used the Specific Hostgroup template, showing a linux servers group:

How To Use Dashboards In Nagios XI 2026

Custom Smart Dashboard

To create a custom Smart dashboard, click **Add New Dashboard** in the **Dashboard Tools** section. Enter a **Title**, select **Smart**, and choose whether to make the dashboard personal or **Global** (visible to all other XI system users).

The 'Add Dashboard' modal form is displayed with a dark theme. It includes a title input field containing 'Main HUD', a 'Dashboard Type' section with 'Smart' selected and 'Legacy' unselected, and a 'Global' toggle switch that is currently turned off. A blue 'Submit' button is located at the bottom right.

Add Dashboard ✕

Use this to add a dashboard to your Dashboards page

Title

Creating, Using, and Managing Smart Dashlets

Adding Smart Dashlets

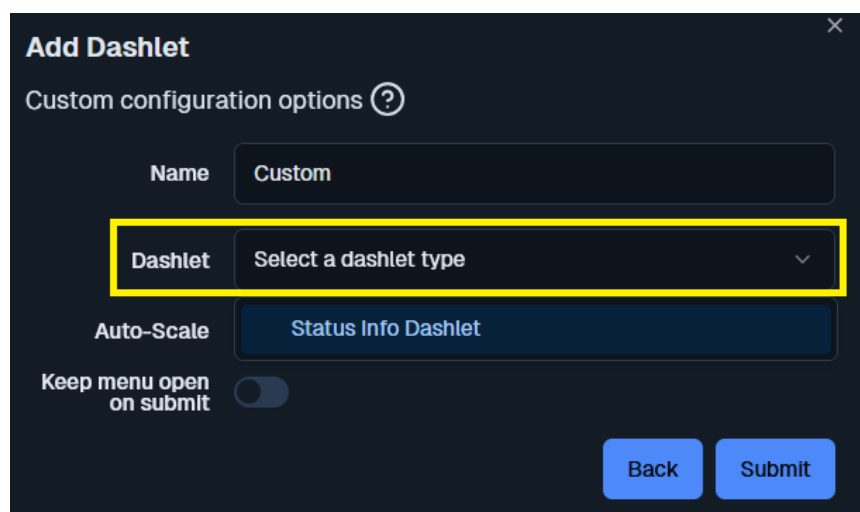

To add a new dashlet, click **+ Add Dashlet** at the top of the dashboard:

Next, click the type of dashlet you'd like to use from the many available options.

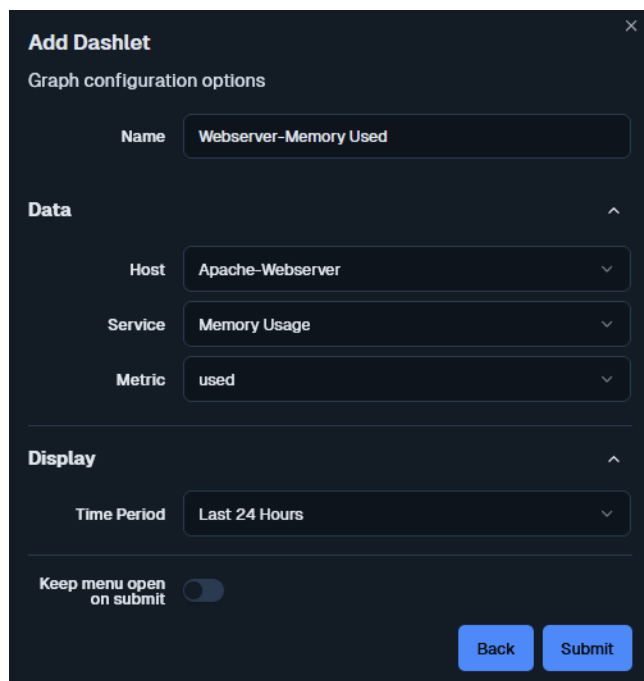

Note that the **Custom** dashlet type enables you to add custom dashlets you've created to your Smart dashboards. Any dashlets you've added in the **Admin > System Extensions > Manage Dashlets** menu will appear in the **Dashlet** dropdown in the setup window for the Custom type.

How To Use Dashboards In Nagios XI 2026

For this example, we'll create a **Graph** dashlet. First, assign a **Name** for your dashlet, which will appear on it's upper left to help you identify it. Next, choose the **Host**, **Service**, and **Metric** you'd like to create a graph dashlet of, such as Memory Usage on a Webserver over the last 24 hours.

If you toggle **Keep menu open on submit**, the **Add Dashlet** dialog will remain open after creation, enabling you to immediately create another one.

Keep menu open on submit ☐

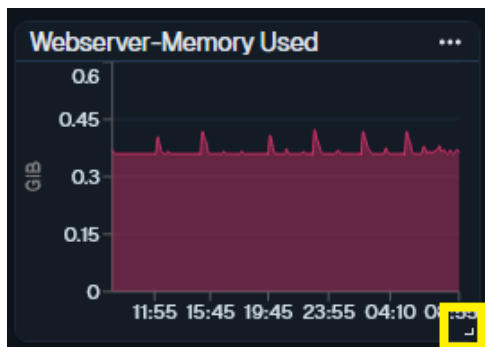

When finished, click **Submit**, and your new dashlet will appear on your dashboard.

How To Use Dashboards In Nagios XI 2026

Resizing and Moving Smart Dashlets

To resize a Smart dashlet, click and hold on the bottom right corner, and drag it to the desired size.

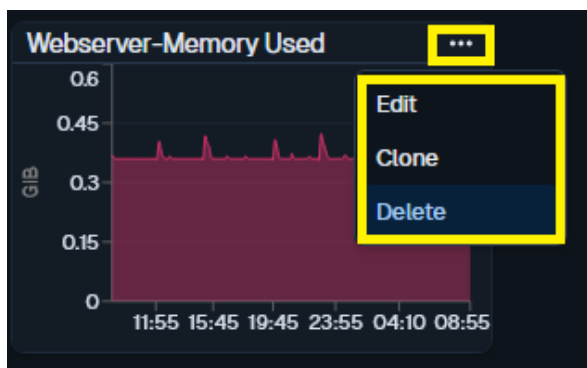

To move a dashlet, click and hold on the top title bar, and move it where you'd like it to go. Other dashlets will dynamically move to accommodate it's new location, and can be re-arranged as you see fit once your re-located dashlet is in place.

Editing, Cloning, and Deleting Smart Dashlets

Click the Actions icon on the upper right of a dashlet to edit it's settings, clone it, or delete it.

How To Use Dashboards In Nagios XI 2026

Refreshing and Adjusting the Auto Refresh Interval

To refresh your dashboard so that it reflects the latest Nagios check data, click the **Refresh** icon.

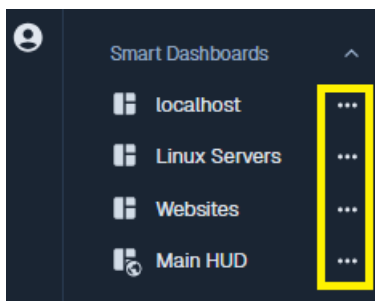

To adjust the Auto Refresh interval (default 5 minutes), click the down-arrow to the right of the Refresh icon, and select your desired rate.

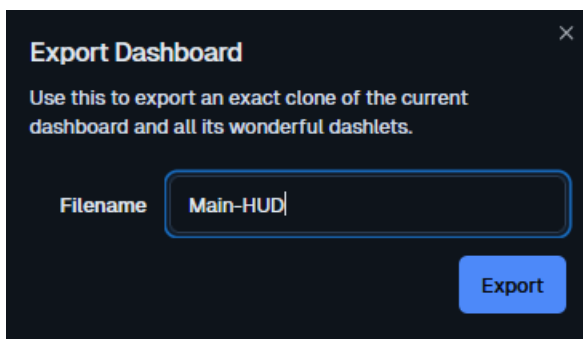

Renaming and Deleting Smart Dashboards

To rename or delete an existing dashboard, click the Actions icon to the right of its name in the lefthand **Smart Dashboards** section of the **Dashboards** menu.

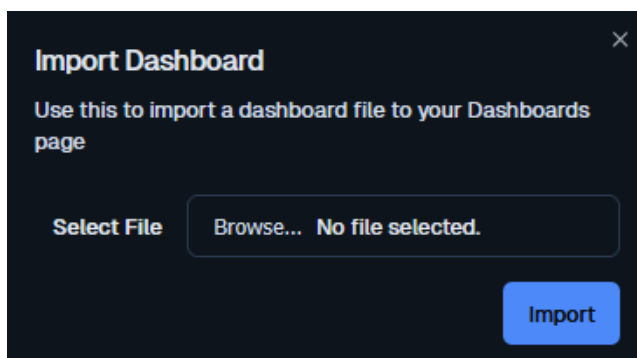

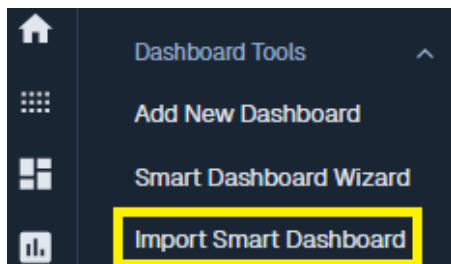

Exporting and Importing Smart Dashboards

Dashboards can be exported as a json file to be shared with other users. To export a dashboard, click the Export button, then select a filename and click **Export**.

How To Use Dashboards In Nagios XI 2026

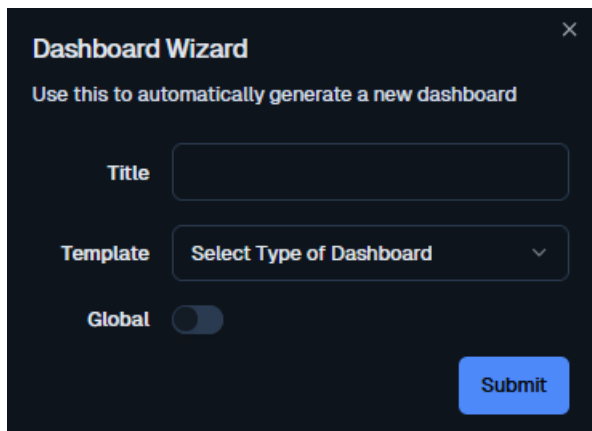

To import a dashboard using a json file, click **Import Smart Dashboard** in the lefthand **Dashboard Tools** section, then select your file and click **Import**.

Creating a New Legacy Dashboard

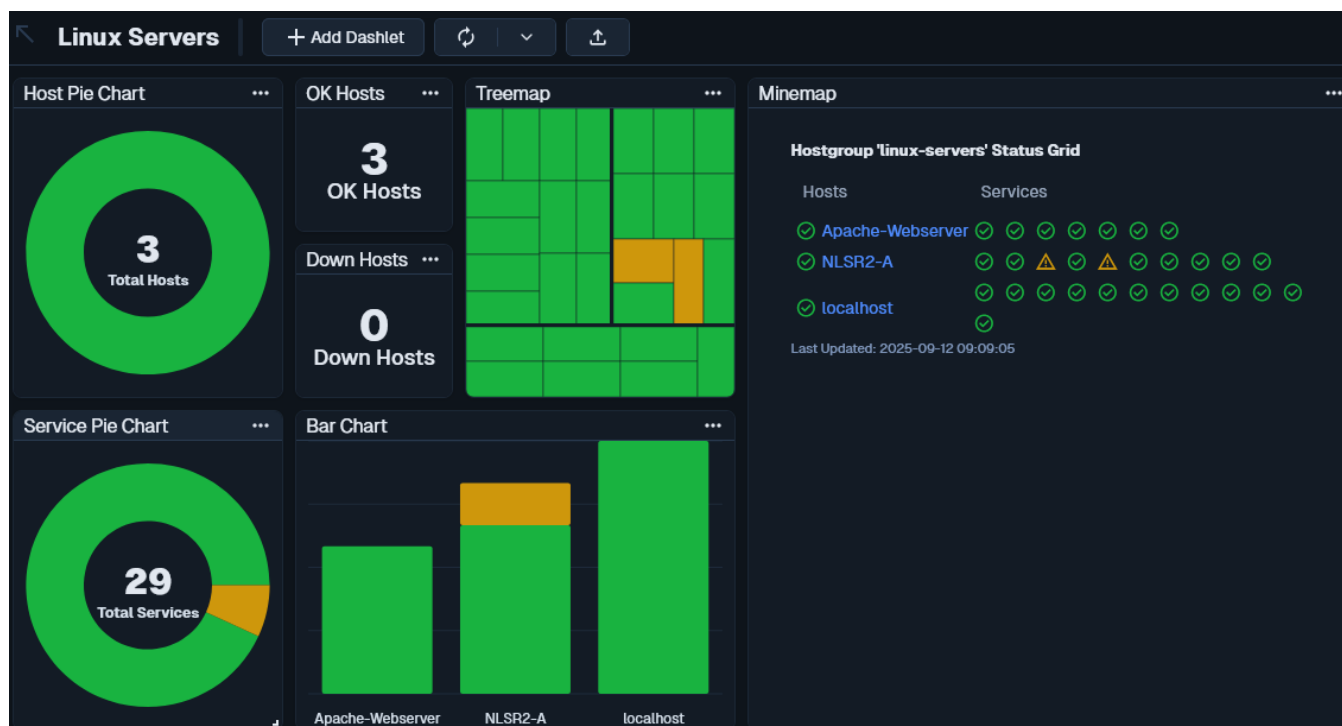

Dashboard Wizard

To automatically generate a new Legacy dashboard, click **Dashboard Wizard** in the **Legacy Dashboard Tools** section, then give it a **Title**, select the object or group you'd like to use as a data source in the **Template** dropdown. You can also choose whether to make it a personal dashboard visible only to your user, or a Global dashboard visible to all system users.

How To Use Dashboards In Nagios XI 2026

Once you make your selections, click Submit, and a new dashboard will be created for you. Here's an example that used the **Specific Hostgroup** template, showing a linux servers group:

Custom Legacy Dashboard

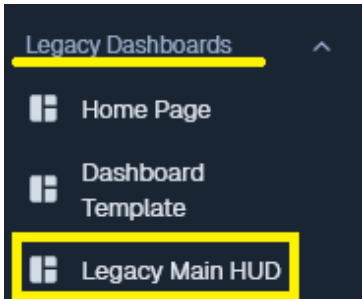

To create a new Legacy dashboard, click the **Add New Dashboard** link under the **Dashboard Tools**, and select **Legacy**. Enter a title, choose either a Transparent background or a custom background color, then click **Submit** to create your dashboard.

The screenshot shows the "Add Dashboard" form in Nagios XI. The form includes the following fields and options:

- Title:** A text input field containing "Legacy Main HUD".
- Dashboard Type:** Two radio buttons: "Smart" and "Legacy". The "Legacy" option is selected.
- Background:** Two checkboxes: "Background" (unchecked) and "Transparent" (checked).
- Submit:** A blue button at the bottom right of the form.

How To Use Dashboards In Nagios XI 2026

Once the dashboard has been created it will now appear in the Legacy Dashboards section in the lefthand menu. Clicking it will reveal an empty dashboard.

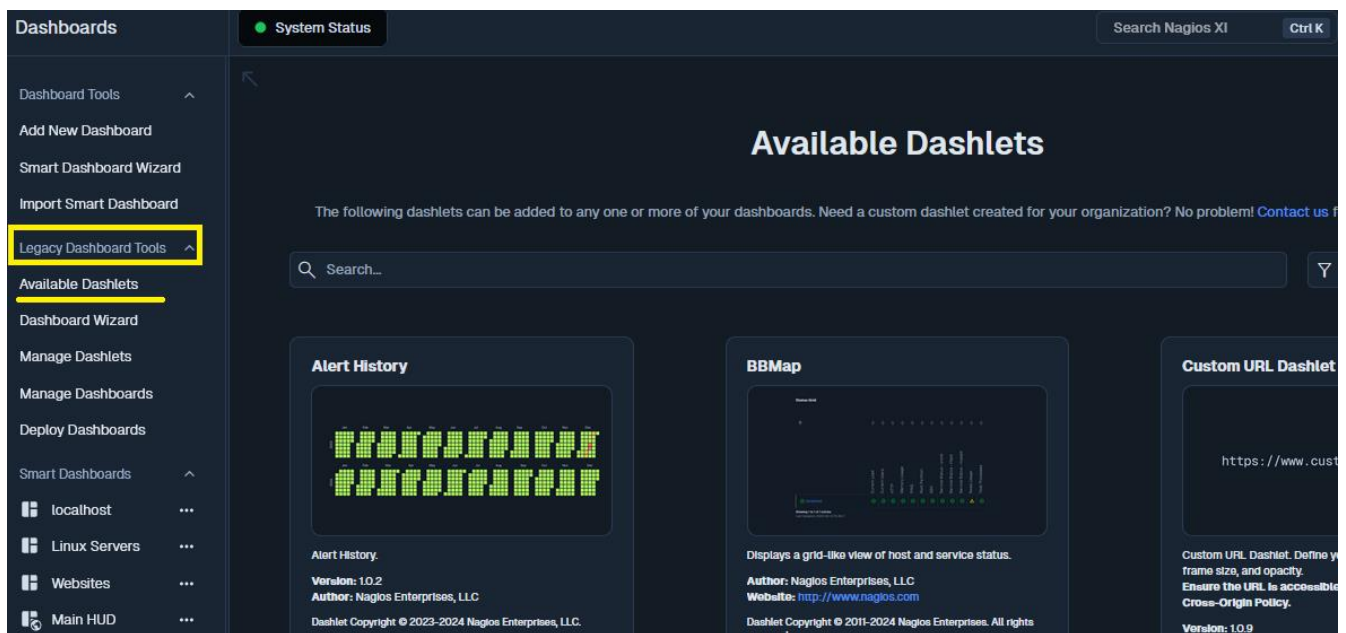

Adding, Using, and Managing Legacy Dashlets

Adding Legacy Dashlets

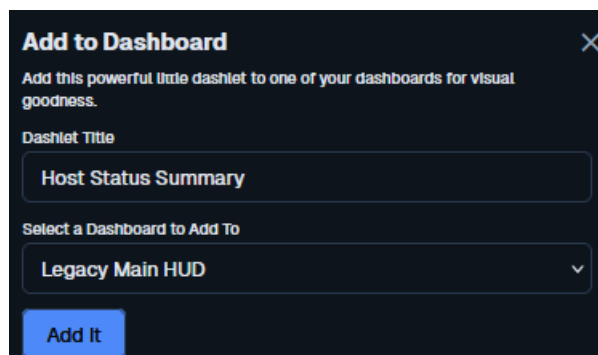

A dashboard is simply an empty page until you add a dashlet to it. Dashlets are nearly everywhere in the Nagios XI interface. Wherever you are in the Nagios XI interface, when you see the  icon, you can add that graphical element to any Legacy dashboard.

1. Click the **Available Dashlets** link in the left pane under **Legacy Dashboard Tools** to view a list of available dashlets.

How To Use Dashboards In Nagios XI 2026

2. To add a dashlet to a dashboard, click the image for that dashlet.
3. The **Add to Dashboard** window appears. The dashlet being added in this example requires you to provide a **Dashlet Title**.
4. You also need to select which dashboard you want to add the dashlet to.
5. Click the **Add It** button to add the dashlet.

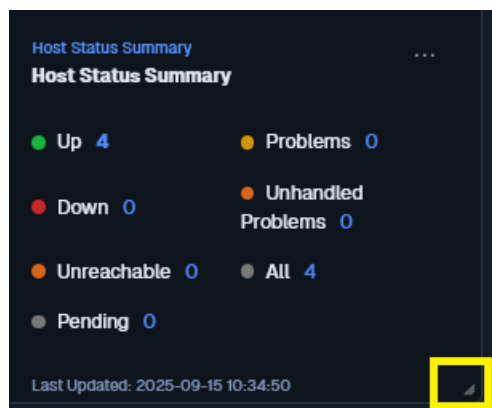

6. After adding the dashlet, navigate to the dashboard you added it to (under **Legacy Dashboards**).

Note that you can also right-click any empty space in a dashboard and select Add Dashlet to open the Available Dashlets menu and choose a new dashlet.

Resizing and Moving Legacy Dashlets

To resize a Legacy Dashlet, click-hold on the bottom right corner and drag it to your desired size.

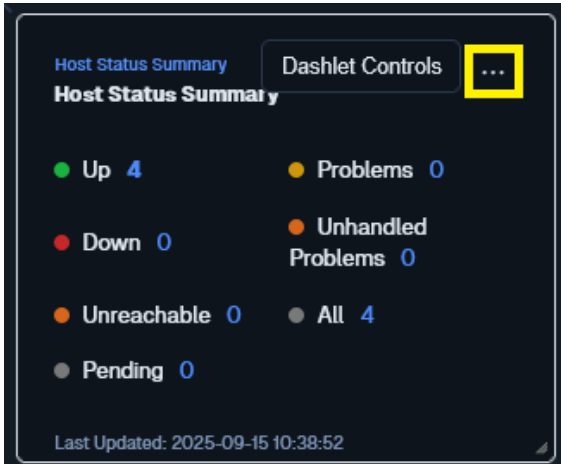

To move a dashlet, click-hold on it, then drag it to where you'd like it to go.

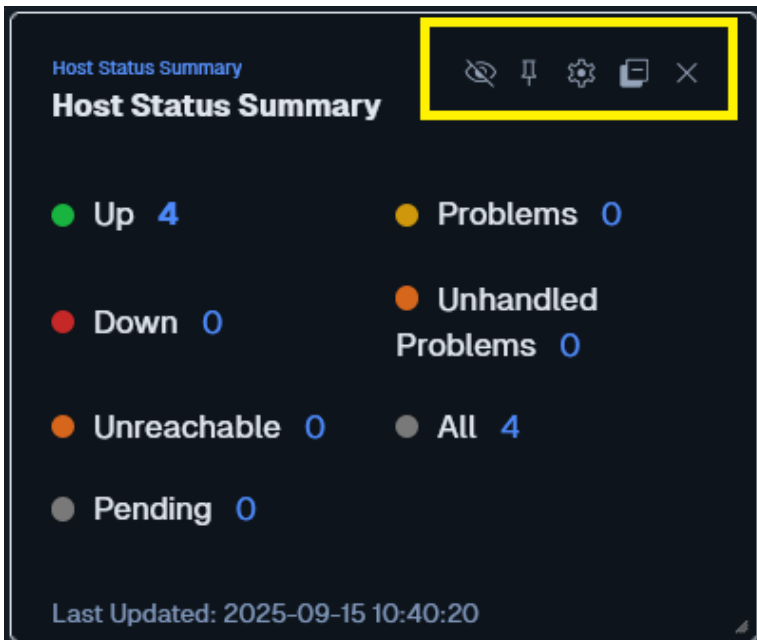

How To Use Dashboards In Nagios XI 2026

Legacy Dashlet Controls

To access dashlet control options, either click the Actions icon if it is a small dashlet:

...or hover over the dashlet to see icons for the available actions if the dashlet is large enough to show them:

How To Use Dashboards In Nagios XI 2026

Hide Title (eye icon)

This enables you to hide the blue dashlet title:

Pin (pin icon)

This enables you to pin a dashlet in place, so that it cannot be moved, and won't dynamically arrange itself when other dashlets are moved, until un-pinned.

Re-configure (gear icon)

This option enables you to re-configure some basic settings of your dashlet, such as its Title.

Hide Background (2 squares icon)

This option can be used to make the dashlet background transparent.

Delete (x icon)

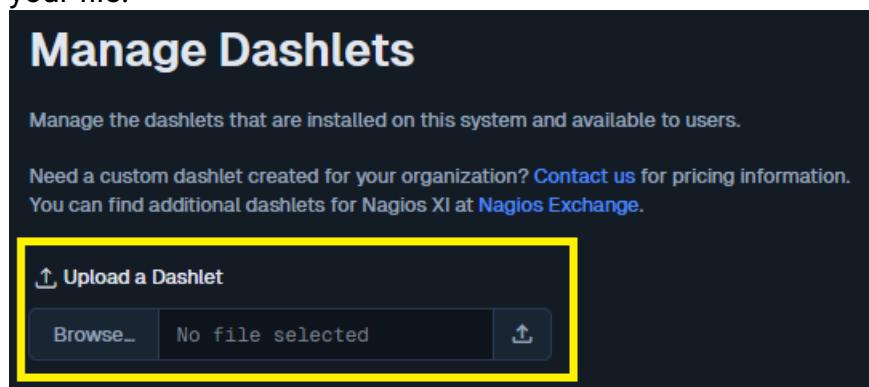

Use this option to permanently delete a dashlet from a dashboard.

How To Use Dashboards In Nagios XI 2026

Importing Legacy Dashlets

If you've developed a new dashlet of your own, or would like to add a dashlet found somewhere like the Nagios Exchange community site, goto **Legacy Dashboard Tools > Manage Dashlets** and select your file.

Downloading and Deleting Dashlets from the System

To download a dashlet file, click the download icon on it's upper right in **Legacy Dashboard Tools > Manage Dashlets**.

To permanently delete a dashlet from the system, click the delete (trashcan) icon.

How To Use Dashboards In Nagios XI 2026

Managing Legacy Dashboards

Legacy Dashboard Tools > Manage Dashboards Menu Options

To **clone** a dashboard click the Clone icon. Select a Title for the new dashboard, then click **Clone**.

To **edit** a dashboard Title and background options, click the Edit icon.

To **export** a .txt file containing the dashboard settings that can be shared and imported, click the Export icon.

To permanently **delete** a dashboard from the system, click the delete icon.

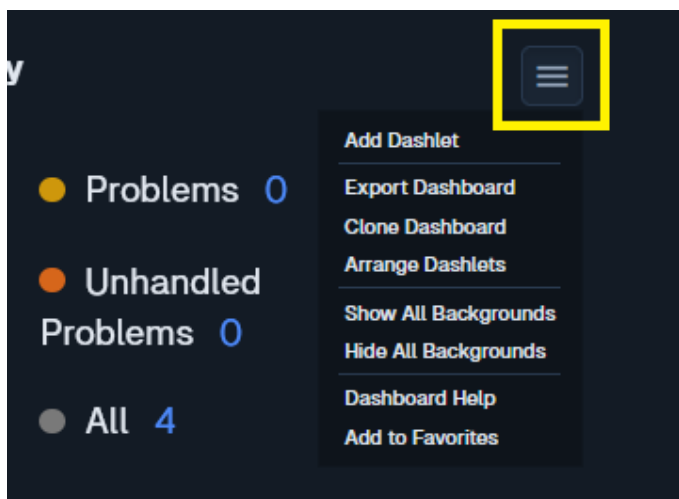

To **import** a dashboard txt file that has been shared with you, click the blue Import button, then select your file.

How To Use Dashboards In Nagios XI 2026

In-Dashboard Menu Options

You also can access various options by either right-clicking on any empty space in a dashboard, or by clicking the Actions icon on the upper right of a legacy dashboard.

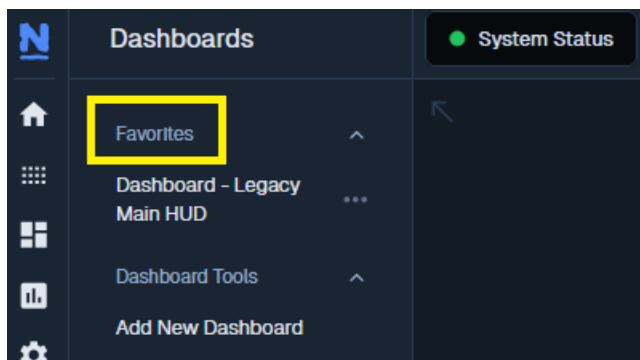

Export and **Clone** function as described above in the previous section.

Arrange Dashlets will auto-arrange the dashlets on your dashboard.

Show/Hide All Backgrounds will either show or hide the background on all dashlets on your dashboard.

Dashboard Help will provide you with links to resources to help you manage Dashboards.

Add to Favorites will add the dashboard to your menu Favorites.

How To Use Dashboards In Nagios XI 2026

Deploying Legacy Dashboards

Nagios XI allows you to deploy your dashboards to other Nagios XI users. Only a Nagios XI Administrator can deploy dashboards.

This can be performed via **Legacy Dashboard Tools > Deploy Dashboards**.

The screenshot shows the 'Dashboard Deployment Tool' interface. It includes a title, a description of the tool's purpose, and a note about re-deploying dashboards. The main section is titled 'Dashboards To Deploy' and contains a table with columns: Deploy, ID, Local Name, Destination Name, and Keep Synced. Below the table are 'All / None' links for each column. The table lists three dashboards: 'home' (Home Page), 'cool' (Dashboard Template), and 'MGFIMCkK' (IT Dashboard). Each row has a checkbox in the 'Deploy' column and a checkbox in the 'Keep Synced' column. Below the table is a section titled 'Deploy To Users' with a link to 'Check All / Uncheck All' and a list of users, including 'joesmith (Joe)' with a checkbox. At the bottom are 'Deploy Dashboards' and 'Cancel' buttons.

Dashboard Deployment Tool

This tool allows admins to deploy one or more of their own dashboards to other users. This can be useful when you design a dashboard that other users may want access to. If you want each user's copy of your dashboard to stay synchronized with your dashboard, select the 'Keep Synced' option.

Note: Re-deploying a dashboard that has already been deployed will overwrite the user's old copy of the deployed dashboard.

Dashboards To Deploy

Specify which of your dashboards should be deployed.

Deploy	ID	Local Name	Destination Name	Keep Synced
All / None				All / None
<input type="checkbox"/>	home	Home Page	<input type="text" value="Home Page"/>	<input type="checkbox"/>
<input type="checkbox"/>	cool	Dashboard Template	<input type="text" value="Dashboard Template"/>	<input type="checkbox"/>
<input type="checkbox"/>	MGFIMCkK	IT Dashboard	<input type="text" value="IT Dashboard"/>	<input type="checkbox"/>

Deploy To Users

Specify which users the dashboards should be deployed to. [Check All / Uncheck All](#)

☐ joesmith (Joe)

When using the Dashboard Deployment Tool there are several options available.

1. Select which dashboards you want to deploy by checking the boxes in the **Deploy** column.
2. You can change the name of the dashboard by updating the field in the **Destination Name** column.
3. The **Keep Synced** option ensures that if a dashboard is updated, it will be updated to all the users it was deployed to.
4. Select the users in the Deploy To Users list that you want to receive the dashboards chosen in the options above.
5. Click the Deploy Dashboards button to deploy the dashboards to the users.

How To Use Dashboards In Nagios XI 2026

Note: It is worth mentioning that there is no central way to manage every user's dashboards on one screen. You can only manage Legacy dashboards for the user that you are currently logged in as, be they personal or deployed.

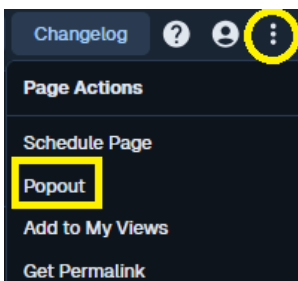

If you plan on creating Legacy dashboards that you will be deploying to many users and updating these dashboards on a regular basis, it is recommended to create a dedicated Nagios XI user account for this specific purpose. This allows you to centrally manage these dashboards and means you do not have any issues when a user is no longer granted access to Nagios XI (if a user left the company and their Nagios XI user account was deleted, their dashboards will be lost).

Popout or Fullscreen a Smart or Legacy Dashboard

Sometimes you do not need the **Navigation** pane or menu bar when viewing a dashboard. There are two ways that you can achieve this functionality in both Smart and Legacy Dashboards.

Popout

On the far right of the top menu bar there is an icon with three vertical dots. When you hover over this icon a drop-down list of options appears. Click the **Popout** icon to open the current dashboard into a new tab / window.

Fullscreen

You can click the upward pointing **arrow** icon that appears in the upper left of a dashboard to expand it to fill the browser window.

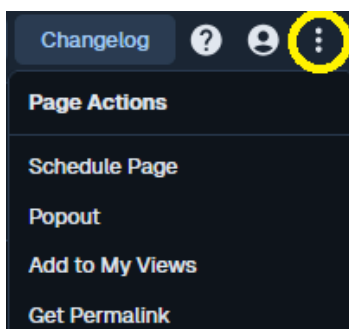

After clicking the **arrow** icon the dashboard will appear without any navigation pane or menu bar. There is now a downward pointing arrow icon in the upper left that will allow you to close the full screen mode to restore the navigation pane and menu bar.

How To Use Dashboards In Nagios XI 2026

Other Smart and Legacy Dashboard Options

You will notice several other options available when you click the three vertical dots icon on the upper right.

Schedule Page

To schedule a dashboard for automatic delivery as PDF, choose this option, then customize the various settings:

Schedule New Page

Use this form to create a new scheduled report that is sent to one or more recipients you define.

Page URL:
The relative URL of the page to deliver as a scheduled report.

Original URL:

Report Name:
The name you want to use for this report.

Schedule: Frequency: Time: :
Specify the schedule you want this report to be emailed.

Attachments: ☒ PDF
The specified page will be rendered and delivered as a PDF.

Recipients:
Comma-separated list of email addresses this report should be sent to.

Subject:
The subject that should be used for the report email.

Message:
A custom message to be added to the report email.

☐ Do not show this report in the my scheduled reports menu section.

How To Use Dashboards In Nagios XI 2026

Add to My Views

Choose this option to add a Dashboard to your Views rotation. Enter a **View Title**, then click **Submit**.

Get Permalink

Use this option to generate a URL that goes directly to the dashboard.

Using Dashboards as Your Home Landing Page

To learn more about how to make your Home page a custom dashboard, you can refer to this document:

[Customizing the Landing Page in Nagios XI 2026](#)

Finishing Up

This completes the documentation on Using Dashboards in Nagios XI 2026. If you have additional questions or other support-related questions, please visit us at our Nagios Support Forum, Nagios Knowledge Base, or Nagios Library:
