

The Industry Standard in IT Infrastructure Monitoring

Nagios® XI™ 2014 delivers more power and flexibility for monitoring your IT infrastructure.

Nagios XI 2014 delivers powerful features that save you time and money, deepen your understanding of your infrastructure, and provide for faster resolution of problems. Nagios XI 2014 is available in two editions – **Standard** and **Enterprise**. The features available in each edition are shown in the table below.

Features \ Edition	Standard	Enterprise	Benefit
Configuration Rollback	✓	✓	Allows administrators to easily recover from configuration errors by rolling back to known good snapshots.
New Wizards and Components	✓	✓	New wizards and components add additional functionality and are automatically installed and upgraded with each new release.
Tools Menu	✓	✓	Allows users to integrate custom and 3rd-party applications directly into the XI interface to increase productivity.
Bandwidth Report	✓	✓	Provides detailed daily, monthly, quarterly, and yearly bandwidth reports for routers and switches.
Executive Summary Report	✓	✓	Provides management, administrators, and decision-makers with at-a-glance visibility into recent alerts and activity.
Heartbeat Monitoring	✓	✓	Provides essential monitoring of critical hosts and applications on remote machines.
Custom Action URLs	✓	✓	Provides users with ability to add customized links to each host and service.
Advanced Configuration Snapshot Archive	✓	✓	Provides users with an archive of past configuration snapshots to revert to if problems occur in the current configuration.
NOC screens	✓	✓	Provides at-a-glance overview of IT operations from a single screen.
Host rename tool	✓	✓	Allows administrators to quickly and efficiently rename hosts and retain historical performance and alert data.
Instant Remote Host Access	✓	✓	Provides users with instant remote access to any device they are monitoring via RDP, VNC, Telnet, or SSH.
Emailed reports	✓	✓	Allows users to quickly email reports to themselves, team members, and other decision makers.
Enhanced Configuration GUI	✓	✓	Improved GUI for monitoring configuration makes complex tasks easier.
Mobile Interface	✓	✓	Provides compact, intuitive interface for mobile phones and devices.
Custom Host and Service Actions	✓	✓	Allows administrators to define commands and actions that are readily available to user for troubleshooting and fixing problems, opening trouble tickets, and more.
Escalation Wizard	✓	✓	Allows users to easily create notification escalation

Features \ Edition	Standard	Enterprise	Benefit
			policies.
Remote Machine Monitoring	✓	✓	Provides easy to use monitoring of remote machines and devices on external networks without firewall modifications.
Email and Forum Support Services	✓	✓	Customers who purchase a Nagios XI license receive access to customer only tutorials, documentation and top-of-the-line support from knowledgeable technicians.
Capacity Planning Report	-	✓	Provides trending analysis and capacity planning for predicting future upgrade requirements.
Web-based server console access	-	✓	Provides fast, web-based access to the XI server console for performing upgrades and maintenance.
Advanced Business Process Monitoring	-	✓	Provides advanced reporting of critical business processes with automatic group synchronization, advanced grouping logic, and advanced permissions.
Scheduled Reports	-	✓	Provides regularly scheduled reports to be sent to decision makers, management, and administrators via email.
Scheduled pages	-	✓	Allows users to schedule any XI web page to be delivered via email as PDF attachments on a scheduled basis. Great for sending dashboards, custom screens, and more.
Bulk modification tool	-	✓	Allows administrators to quickly modify attributes of thousands of hosts and services in a few simple steps.
Advanced Dashboard Deployment	-	✓	Allows administrators to deploy custom dashboards to other users while syncing to a master Admin dashboard to ensure users receive relevant, up-to-date information.
Bulk notification settings tool	-	✓	Allows administrators to quickly deploy notification settings to users in a few simple steps.
Audit Logging	-	✓	Provides an audit trail of changes and modifications to ensure policy compliance.
Automated Decommissioning	-	✓	Ensures network monitoring work-flow remains clean and organized by automatically removing host configurations for devices that are in a problem state for too long which minimizes false-positives and provides greater network clarity.
Service-Level Agreement (SLA) Reports	-	✓	Provides users the ability to measure effectiveness of specific hosts, services, and business processes to determine if service-level agreements are being met. Schedule reports to be sent on a recurring basis for quick and accurate network performance statistics.
