**NAGIOS**®

## The Industry Standard in IT Infrastructure Monitoring

**Nagios® XI™ 2014 is an enterprise-class solution that provides organizations with extended insight into their IT infrastructure before problems affect critical business processes.**

Nagios XI monitors your entire IT infrastructure to ensure systems, applications, services, and business processes are functioning properly. In the event of a failure, Nagios can alert technical staff of the problem, allowing them to begin remediation processes before outages affect business processes, end-users, or customers. With Nagios you'll never be left having to explain why an unseen infrastructure outage hurt your organization's bottom line.

## Nagios XI is a complete IT infrastructure monitoring and alerting system providing:

- **Comprehensive IT Infrastructure Monitoring:** Provides monitoring of all mission-critical infrastructure components – including applications, services, operating systems, network protocols, systems metrics, and network infrastructure. Hundreds of third-party addons provide for monitoring of virtually all in-house applications, services, and systems.

- **Performance:** With the Nagios Core 4 monitoring engine under the hood, Nagios XI 2014 increases system efficiency allowing greater scalability and maximizing server resources. Easily monitor large infrastructures with Nagios XI 2014.

- **Visibility:** Provides a central view of your entire IT operations network and business processes. Powerful dashboards provide at-a-glance access to powerful monitoring information and third-party data. Views provide users with quick access to the information they find most useful.

- **Awareness:** Alerts are sent to IT staff, business stakeholders, and end users via email or mobile text messages, providing them with outage details so they can start resolving issues immediately.

- **Proactive Planning:** Automated, integrated trending and capacity planning graphs allow organizations to plan for infrastructure upgrades before outdated systems catch them by surprise.

- **Customizability:** A powerful GUI provides for customization of layout, design, and preferences on a per-user basis, giving your customers and team members the flexibility they want.

- **Ease of Use:** Integrated web-based configuration interface lets admins hand out control of managing monitoring configuration, system settings, and more to end users and team members easily. Configuration wizards guide users through the process of monitoring new devices, services, and applications – all without having to understand complex monitoring concepts.

- **Multi-Tenant Capabilities:** Multi-user access to web interface allows stakeholders to view relevant infrastructure status. User-specific views ensures clients only see the infrastructure components they're authorized for. Advanced user management simplifies administration by allowing you to manage user accounts easily. Provision new user accounts with a few clicks and users automatically receive an email with their login credentials.

- **Extendable Architecture:** Multiple APIs provide for simple integration with in-house and third-party applications. Thousands of community-developed addons extend monitoring and native alerting functionality. Custom interface and addon development is available to tailor Nagios XI 2014 to meet your organization's exact needs.

## Solid Open Source Core

We designed Nagios XI to take full advantage of the power of well-known, rock-solid Open Source components.  With over ten years of experience in the IT monitoring space, we know great software when we see it.  Nagios XI extends the capabilities of award-winning components to bring you an unbeatable monitoring and alerting system at a great price.

## Whats Included

- **Technical Support.**  Nagios Enterprises offers priority tech support for Nagios XI via a special customer-only section of our support forum.

- **Updates.**  Customers will receive access to free updates and patches released for the major version of XI they purchase. For example, customers who purchase Nagios XI 2014R1 will receive free updates to 2014R1.1 and 2014R1.2.  Customers who purchase maintenance contracts will receive free updates to future major releases of XI while their maintenance contract is in effect.

- **Upgrade Discounts.**  Customers are eligible for special discount pricing when upgrading to future major releases.

- **Nagios Library.**  Get a full year of access to the Nagios Library with special customer-only tutorials, videos, and tech tips.

- **Product Influence.**  We listen to all Nagios users when determining our product roadmaps, but your feature requests will get bumped up to the front of the line. Tell us what you'd like to see and we'll build our future products to include the newest features you're looking for.

- **Builder Licensing Freedom.**  Build extensions for Nagios XI using our APIs and you choose the license for your dashlet, wizard, or component: Open Source, proprietary, or public domain - the choice is yours.

Revision 1.0 – May, 2014

**Nagios®**

## Technical Features

### Network Monitoring

- TCP/UDP Port
- SMTP
- POP3
- IMAP
- HTTP(S)
- FTP
- SSH
- DNS
- DHCP
- SNMP
- Bandwidth
- Port State
- and more...

### Operating System Monitoring

- Windows
- Linux
- Unix

### Hardware Monitoring

- Routers
- Switches
- Firewalls
- Servers
- Workstations
- Printers
- Environmental Devices
- Generic Network Elements

### Website Monitoring

- Web Content
- Web Transactions
- FQDNS / IP Match
- SSL Certificates
- HTTP(S)

### Reporting

- SLA availability reports
- Alert and notification history
- Trending reports
- Performance graphs
- Capacity Planning
- Scheduled Executive Reports

### Notifications

- Email
- Mobile text
- Custom script

### Extendable

- Thousands of community-developed addons and scripts extend native capabilities

### More

- Multi-tenant/multi-user capabilities
- Notification escalations
- Scheduled downtime
- Acknowledge problems online

## System Requirements

### Server Operating System

- **Virtual Hosts:**
  - VMware Player, Workstation
  - VMware Server, ESX
  - Microsoft Virtual PC
  - Microsoft Virtual Server

- **Linux:**
  - RHEL 5/6 (32-bit/64-bit)
  - CentOS 5/6 (32-bit/64-bit)

### Server Hardware

- 1 GHz CPU (1-2 Cores), 1+ GB RAM (minimum)
- 2 GHz+ CPU (2-4 cores), 4+ GB+ RAM (recommended)

### Server Storage

- 40 GB free space (minimum)
- 80+ GB free space (recommended)

### Browsers

- Firefox 4.0+
- Internet Explorer 9+
- Safari 2.0+
- Chrome 28.0+

### Client Operating Systems

- **Windows**: Windows XP or newer

- **Max**: OS/X

- **Linux/Unix**: 2.4+ kernel Linux distributions, Solaris 9+ , FreeBSD 6.4+, AIX 5.2/5.3
