Hi Ethan,

we made some progress on the Nagios Conference thing:

We changed the official name to "NETWAYS Konferenz für Nagios Anwender" (NETWAYS Conference for Nagios Users) or in short "NETWAYS Nagios Konferenz" (NETWAYS Nagios Conference) and stopped using nagiosconference.\*. We just made a forwarding from the website to the new location within our corporate website.

This makes very clear, that we, NETWAYS host the conference and you are just involved as a speaker. I would prefer to have the redirect from the old to the new location to be active until after the conference and then transfer the domains to you.

Is that OK for you?

Best,  
Julian
