Hi Pamela -

There are a few issues that we'll need to address with Julien before we can both commit to attending the conference and promote it. These issues involve trademark issues, ownership or conference materials, etc.

We are heading out to Sweden, and won't get back to deal with this until mid June.

For the time being, please take my name off the confirmed speakers list.

Once we have business and legal issues worked out, I'd be happy to announce the conference on the Nagios websites, as well as confirm my attendance.

Hope all is going well. Take care and best of luck.

Hi Ethan,

I attached two announcements for NETWAYS Nagios Conference and our logo to this email. It would be great, if you could manage to put them on nagios.org and nagioscommunity.org as soon as possible, as we would like to reach the english community with those postings. There are two different versions: one is intended for nagios.org/latest news and nagioscommunity.org/blog, the other one is a brief summary for nagios.org/propaganda/events, respectively nagioscommunity.org/wiki/current events/conferences. If you need a hand with the postings, please let me know.

Concerning your planned presentations, which were:

- Current state of Nagios - Nagios 3.x product development
- Plans for future Nagios development - Feature enhancements and Roadmap
- Roadmap for commercial products and services for and around Nagios

it would be cool if you could send me a brief abstract to each of them, so we are able to announce the key speakers presentations and the agenda as soon as possible ether.

Best regards
Pamela
